European Privacy Certification

Authoritative Resource List

Introduction

The IAPP and its certification advisory board compiled the following list of books, periodicals, white papers, reports and Web sites for the purpose of furthering education in information privacy. These selections support the Certified Information Privacy Professional/Europe (CIPP/E) credentialing program which assesses candidates' understanding of information privacy laws and practices that apply primarily to the European private sector.

The CIPP/E Authoritative Resource List is divided into three sections:

(1) Authoritative Resources: Core publications (print & digital that encompass the domains on the CIPP/E body of knowledge;

(2) Supplemental Privacy Materials: Privacy-related publications, websites and other resources that augment the authoritative texts; and,

(3) The link to The IAPP Resource Center.

Who Should Review

- **Certification Candidates**: The authoritative texts address the information privacy and information security concepts and issues referenced in the CIPP/E body of knowledge. While the IAPP does not draw from a single source to develop exams, we recommend these publications to candidates studying for their exams. The supplemental readings augment the authoritative texts by focusing on specific areas of the body of knowledge; therefore, the IAPP strongly suggests that you incorporate supplemental reading into your regimen for exam preparation based on your individual needs.

- **Certified Professionals (current CIPP/E credential holders)**: Each of the items listed in this bibliography may be applied toward the continuing privacy education (CPE) requirements mandated under your credential. Upon submission to the IAPP for approval, credits will be awarded based on a formula where 50 pages of written text = 1 CPE credit. Simply tally the total number of pages from your selection and submit for approval using the authorization form available at https://iapp.org/certify/cpe-submit/.

<u>IMPORTANT</u>: You must include photocopies of both the cover and inside table of contents of the selection(s) you submit for CPE consideration.

Authoritative Resources

While we recommend these resources as comprehensive, widely-recognized privacy publications that cover the topics outlined in the CIPP/E body of knowledge, candidates for certification must understand that no published text can keep pace with the rapidly-changing privacy landscape. We continuously adjust our exam content to represent the latest regulatory and technological changes and we expect candidates for IAPP certification to know about the important developments in their sector that may modify or supplant information in the authoritative texts.

IAPP Resource Center

The IAPP Resource Center is a searchable Privacy Library containing the most up to date articles, research, and practical guidance on a wide range of privacy topics and issues. Certification candidates are advised to supplement their preparation by referring to this valuable content. The Resource Center also houses the IAPP Glossary of Privacy Terms, which contains important definitions and descriptions catalogued by certification designation.
